MyPro “making IT simple”

We are MyPro, a specialized Information Technology firm with extensive experience in Consultancy and Systems Integration at our core.

Our organization has evolved from establishing network and server infrastructure, developing and deploying applications, and providing software and hardware peripherals, to being recognized as a prominent supplier of integrated IT Solutions.

At MyPro, we are dedicated to offering innovative and cost-effective services, consistently adhering to our principle of “Making IT Simple!”

Who We Are

Solutions and Services Overview

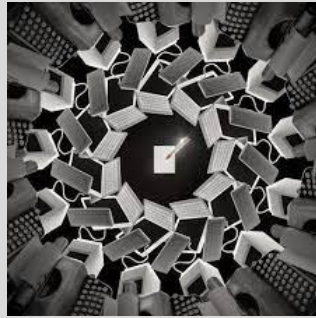

IT Infrastructure

Design, strategize, and construct the IT infrastructure required to enable contemporary business operations.

Cybersecurity

A diverse array of cybersecurity solutions aimed at protecting IT resources from cyber threats and internal vulnerabilities.

Computing Device

Deliver and implement complete solutions encompassing computers and mobile devices, hardware accessories, storage systems, servers, and printers.

Managed Services

IT consultative services provide deployment of IT subject matter experts to lower expenses, enhance service quality, and alleviate the burden on internal resources.

Digital Transformation

Examine business processes, organizational culture, and customer experience by leveraging automation and innovative solutions.

MyPro offer the best to our clients

MyPro offers a range of solutions, products, and services designed to seamlessly adjust to the fast-evolving landscape of technologies and environments.

We cater to needs of every customer from the large enterprise to the Small and Medium Business, down to the Small-Offices, Home-Offices and the retail market. As such, we have partnered with various IT industry leaders to provide you with the latest most relevant IT products and technologies.

Consequently, we are able to provide you with a high quality one-stop shop experience to cater all your requirements.

Our Key Expertise

Our team of Structured Cabling specialists is ready to assist you in designing and installing your cabling projects. We provide comprehensive structured cabling solutions that integrate voice, data, and video traffic across multiple media types within LAN/WAN and wireless networks.

Our network and information security solutions will protect and secure your business and personal data, PCs, Servers, network and communication assets from external and internal attacks. We will provide you with high performance security solutions such as Firewall, Anti-virus, Security Appliance, Intrusion Prevention, Web Security and Email Security.

We provide hardware components and software licensing services to customer that requires Desktop and Server OS, Productivity tools, Antivirus, Database servers and other software licenses you required.

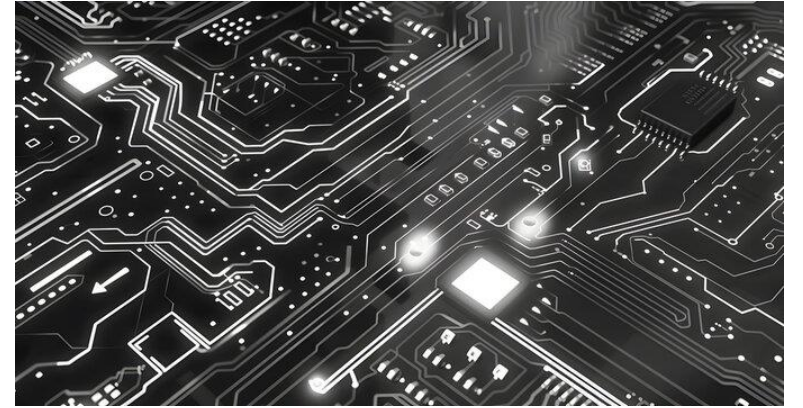

Our Key Expertise

We provide a variety of consultative and technical support services, including network administration, IT helpdesk assistance, preventive maintenance for computer equipment, as well as training and technical briefing sessions.

We provide and deploy resources such as Software Developer/Engineers, Project Consultants, Network and Systems Administrators based from the client requirements as executive search or staff augmentation.

We have a team to help you build your data center infrastructure from ground up from designing, installation and setup. Assembly of servers, network equipment and workstation including telecom, storage with redundant or backup power supply, environment controls (air conditioning and fire suppression) and various security devices that will house your computer systems and associated components.
